View SqueezeTrigger: <http://www.digitalbdinc.com/images/nxplstr3-6-26.JPG>

View Friction Factor: <http://www.digitalbdinc.com/images/nxplff3-6-26.JPG>

Friction Factor calculates if a fair market is being made in the shares of NXPL. 46% of the previous 39 trading days have been positive or bullish-biased and 54% have been negative or bearish-biased.

Regulation SHO requires bona-fide market-making activities to include making purchases and sales in roughly comparable amounts. The Commission has stated that bona-fide market-making DOES NOT include activity that is related to speculative selling strategies for investment purposes of the broker-dealer and is disproportionate to the usual market making patterns or practices of the broker-dealer in that security. Likewise, where a market-maker posts continually at or near the best offer but does not also post at or near the best bid, the market-maker's activities would not generally qualify as bona-fide market-making. Moreover, a market-maker that continually executes short sales away from its posted quotes would generally not be engaging in bona-fide market-making.

Digital BD monitors NXPL market-makers daily for compliance with Fair Market-Making Requirements.
